Glad to help, Lisa.

Hopefully, our ROV folks can get out later in the summer for those few 2nd priority buoys in Dockton.

Hello Rob,

Thank you again for your team's assistance documenting buoy anchors in Quartermaster Harbor, part of the Maury Island Aquatic Reserve. This information will enable DNR to make critical management decisions about authorizing buoy placement, as well as identifying which anchors must be removed. We appreciate this partnership and look forward to future opportunities to continue to work together.

Best regards,

Lisa M. Randlette

Joyce, Mark,

Here's the report from the 5-7 June support for WDNR. This work supports a partner in Puget Sound initiative work - specifically involving subsurface habitat in the Maury Island Aquatic Reserve.

The dive work was only part of the effort - the ROV team was working off the Wooldive at the same time collected good imagery of buoy lines, chains, anchor systems, and sunken derelict vessel(s).

Overall, good practice with multiple tools over three days - relatively close to 'home'.

(See attached file: DR2012-06-05-07 Quartermaster-WDNR.pdf)
